PERSONAL PROFILE

4th-year Information Technology student at Ateneo de Davao University, specializing in UI/UX design and frontend-focused full-stack development. Experienced in taking projects from concept through production deployment: brand identity, design systems, sprint-based builds, and live hosting. Also brings video editing skills and a minor background in social media management. Currently building a freelance client base and open to remote work with clients based locally or internationally.

CORE COMPETENCIES

Frontend Development: React, TypeScript, Tailwind CSS, shadcn/ui, Progressive Web App (PWA) development

Backend & Infrastructure: Supabase, Node.js, Express, MySQL, Vercel deployment and hosting

UI/UX Design: Design systems and brand identity, Figma, Gestalt principles, WCAG accessibility standards, 8pt grid system

Project Practices: Sprint-based planning and delivery, state management with Zustand, AI-assisted development workflows using Claude Code

Content & Digital Media: Video editing, social media management (minor background)

PROJECT EXPERIENCE

Present by GGCAST: QR-Based Attendance System

React · Tailwind CSS · Supabase · Vercel

- Designed and developed a full QR-based attendance system for school use, covering the complete lifecycle from concept to deployment.
- Created a custom mint-green brand identity and visual design system for the product.
- Built schedule and calendar features, along with a first-time user onboarding flow.
- Ran the build using a structured, sprint-based development process and deployed the finished product on Vercel with a Supabase backend.

Gov Gen Bangers: Pickleball Club PWA

React · Tailwind CSS · Supabase · Vercel

- Built a mobile-first Progressive Web App for a local pickleball club, including a deep navy and green visual design system.
- Developed a round-robin tournament bracket engine with live score tracking and a public leaderboard.
- Led a major UI/UX overhaul sprint focused on improving usability, visual consistency, and mobile responsiveness.

Rally: Pickleball Open Play PWA

React · Zustand · Tailwind CSS · PWA

- Delivered a complete product across a structured 7-sprint development plan.
- Designed an Apple-inspired visual language, prioritizing clarity and minimalism.
- Implemented state persistence using Zustand with localStorage, and configured full PWA capability for offline-friendly use.
- Deployed the finished application to Vercel.

Boyd's Pizza House: Restaurant Operations Management Information System

React (Vite) · Node.js · Express · MySQL

- Built and presented a full-stack operations management system as a capstone project at Ateneo de Davao University.
- Designed the relational database schema and REST API architecture, in addition to the client-facing interface.

Smart Menu Pricing System: Capstone Project

React · Supabase

- Designed a smart menu pricing tool for small restaurants in Kidapawan City, developed as part of Ateneo de Davao University coursework.
- Managed the project on a structured sprint schedule, using a dedicated Claude Project workspace for planning and iteration.

FREELANCE & ENTREPRENEURIAL EXPERIENCE

- Assembled a full freelance client acquisition pipeline, including a portfolio website, Upwork profile, Fiverr gig, and local Davao-based outreach, using Presnt, Rally, and Gov Gen Bangers as case studies.
- Built a reusable prompt-template library covering all six phases of a client project lifecycle, designed for use with AI-assisted development tools.
- Explored additional income streams including freelance development work and content creation.

EDUCATION

BS Information Technology, UI/UX Design Specialization

Ateneo de Davao University · Davao City · 4th Year (Expected graduation pending)
